

# TOOLKIT FOR NAVIGATING YOUR STATE'S DIGITAL ID SYSTEM

Below are 3 charts to guide you in resisting Digital ID Systems no matter where your state government is in the process of exploring or adopting them.

## STEP ONE:

Find your state and its digital ID system **status**. Use the **Key** to understand your state's Digital ID system status.

## STEP TWO:

Use the **Action** chart below to identify what actions you should take based on your state's digital ID system status. A more detailed spreadsheet of states' digital ID systems statuses, relevant legislation, and active corporate vendors is [here](#).

## STEP THREE:

Reference CRCR's Demands for Protecting Human Dignity and Choice from Digital Identification Systems (below) when taking action.

# KEY

STATUS	DEFINITION
● <b>No Digi ID System</b>	There is no digital ID or mobile driver's license program or legislation in your state.
● <b>Deactivated Digi ID System</b>	A digital ID or mobile driver's license program was launched in your state, but then it was deactivated. This typically happens because the cost or performance of the related software was unsatisfactory to the government.
● <b>Exploratory or Pre-Launch</b>	There has been news or supportive legislation in your state to launch or pilot a digital ID or mobile driver's license program in your state. This is the broadest category with some states having a press conference about mDLs to others having enacted laws.
● <b>Launched - Some/Minimal Protections</b>	Your state has launched a digital ID or mobile driver's license program or pilot in your state that includes some protections. This includes states with a wide range of protections including references to related privacy laws (CA, IL) or active bills supporting selective disclosure or identifying information. For this guide, "minimal protections" at the most means protecting the ability to still use a physical ID and in some instances from police access to your phone.
● <b>Launched - No Law</b>	Your state has launched a digital ID or mobile driver's license program or pilot in your state that has no supportive legislation guaranteeing you protections.

# STEP TWO:

## IDENTIFY WHAT ACTION

### IF YOUR STATE:

Does not have  
or has  
Deactivated a  
Digital ID  
System (“No  
Digi ID  
System”,  
“Deactivated”  
in guide  
below)

- **Daily Digital Resistance.**
  - Enjoy using your physical ID, cash, and choosing clerks instead of self-checkout at stores.
- **Build the Firewall: Stay Vigilant, Block Digital ID Launches.**
  - Set up news and legislative alerts for “digital ID,” “mobile driver’s licenses” or “mDL” in your state.
  - Pay attention to your state motor vehicle department’s news—you can even investigate its budget—and look out for enabling legislation.
  - Stay abreast of any Digital ID System inklings in your local government and use the resources on our website to reach out to your community, reach out to elected officials, and testify in public hearings about how digital ID systems will impact your community.
  - Any state that does not adopt a Digital ID System protects us all from complete nationwide coverage—thank you for holding the line!
- **Build the Firewall: Ban Digital ID Systems in Your State.**
  - Even with some protections in place, a federal digital ID system would lay the groundwork for an inescapable number of surveillance threats. Fight to preserve physical IDs, cash, and in-person check out.
  - Reference Demands for Protecting Human Dignity and Choice from Digital Identification Systems to educate your local government.

# IF YOUR STATE:

**Has passed  
legislation for  
a study or  
indicated  
interest in a  
Digital ID  
System pilot  
(“Exploratory  
or Pre-  
Launch” in  
guide below)**

- **Daily Digital Resistance.**
  - Enjoy using your physical ID, cash, and choose the clerks and not self-checkout at stores.
- **Build the Firewall: Provide Feedback on the Pilot or New Digital ID System.**
  - Research how your local government is conducting your Digital ID System Study, Pilot, or New Digital ID System and how you can provide feedback.
  - Voice your opinion and organize with community members. Discuss how Digital ID Systems could affect your lives and coordinate ways to engage with your local lawmakers.
- **Build the Firewall: Demand No Digital ID, Without Full Legal Protections.**
  - Reference Demands for Protecting Human Dignity and Choice from Digital Identification Systems to educate your local government.

# IF YOUR STATE:

Has passed a  
Digital ID  
System with  
no legal  
protections or  
passed a law  
with minimal  
protections  
(*“Launched -  
No Law” or  
“Launched -  
Some/  
Minimal  
Protections”  
in guide  
below*)

- **Daily Digital Resistance.**

- Enjoy using your physical ID, cash, and choose the clerks and not self-checkout at stores.

- **Build the Firewall: Demand Your Digital ID System Pilot Be Paused.**

- Find your state representatives and demand they say no to modernization without democratic debate! A law that simply adds “mobile” or “digital” to a historic driver’s license provision has not democratically debated the consequences of a federal ID system with the public.
- Organize with community members. Discuss how Digital ID Systems could affect your lives and coordinate ways to engage with your local lawmakers

- **Build the Firewall: Demand No Digital ID, Without Full Legal Protections.**

- Reference Demands for Protecting Human Dignity and Choice from Digital Identification Systems to educate your local government.
